

MS Obstetrics & Gynaecology

During the study period 6 monthly assessment report is to be forwarded by guide through HOD & Dean to University about the observed progress. Student should not allow to appear for examination if found not satisfactory by local academic committee.

OBSTETRICS:

- 1. Basic sciences
 - A. Applied Anatomy in females of genito urinary system, abdomen, pelvis, pelvic floor, anterior abdominal wall and breast.
 - B. Anatomy of fetus
 - C. Fundamentals of reproduction Gametogensis fertilization, implantation & early development of human embryo. Placenta development, structure, functions Amniotic fluid formation and function Fetal growth & development, fetal physiology Birth defects, Genetics & teratology & counselling. Physiological changes during pregnancy, labour and puerperium Endocrinology of pregnancy. Lactation Immunology of pregnancy Molecular biology
- 2. Normal pregnancy, labour & puerperium. Breast feeding baby friendly initiative
- Early recognition and prompt management of pregnancy complications, Hyperemesis gravidarum, abortions, ectopic pregnancy, hydatidiform mole, Pre-eclampsia, eclampsia, Pathophysiology of PIH, Antepartum hemorrhage, multiple pregnancy, polyhydramnios, Oligohydramnios & Prolonged pregnancy.
- 4. Management of pregnancies complicated by medical, surgical or gynaecological diseases, in consultation with the concerned specialities by team approach.
 - Anemia,Heart disease,diabetes mellitus, liver disorders,Respiratory diseases, Renal diseases, CNS disorder, Skin, Psychiatry Hypertensive disorders.
 - > Acute abdomen, Acute Appendicitis, Intestinal obstruction, perforations.
 - > Fibroids, Ovarian tumors, Carcinoma cervix, genital prolapse.
 - Recent advances in medical and surgical management.

5. Infections in pregnancy.

Malaria, Toxoplasmosis, viral infections (Rubella, CMV, Hepatitis B, Herpes) syphilis and Other sexually transmitted infections including HIV, Leptospirosis. Parents to child transmission of HIV infection. (PPTCT)

- 6. Evaluation of the fetal and maternal health in complicated pregnancy by making use of available diagnostic modalities and plan for safe delivery of the fetus while safeguarding the maternal health. Identification of fetus at risk and management. High risk pregnancy Post caesarean pregnancy, prolonged gestation, preterm labour, fetal growth restriction, premature rupture of membranes, blood group incompatibility, recurrent pregnancy wastages. Imaging techniques, CTG
- Prenatal diagnosis of fetal abnormalities and appropriate care. Fetal therapy. PNDT Act and its implications.
- 8. Partographic monitoring of labour progress, early recognition of dysfunctional labour and appropriate interventions during labour including active management of labour.
- 9. Obstetrical analgesia and anesthesia.
- 10. Induction and augmentation of labour.
- 11. Management of abnormal labour : Abnormal pelvis, soft tissue abnormalities in birth passage, Malpresentation and malpositions of fetus, abnormal uterine action, obstructed labour and cervical dystocia. Third stage complications PPH including surgical management, retained placenta, uterine inversion, post partum collapse, amniotic fluid embolism.
- 12. Abnormal puerperium, Puerperal sepsis Thrombophlebitis, Mastitis, Puerperal venous sinus thrombosis, Psychosis.
- 13. National Health Programmes to improve the maternal and child health, social obstetrics and vital statistics. (Maternal and Perinatal mortality)
- 14. Drugs used in obstetric practice including prostaglandins. FDA Classification
- 15. Coagulation disorders in obstetrics, Blood and component therapy.
- 16. Operative obstetrics decision making, technique, recognition and management of complications C.S. instrumental delivery, obstetrics hysterectomy, role of

destructive surgery.Manipulations-version,MRP etc. Forceps,Vaccum, Internal iliac artery ligation

- 17. Intensive care in obstetrics for critically ill patient. Fluid and electrolyte balance, volume status maintenance, protecting vital organ function.
- 18. Provision of safe abortion services selection of case, techniques, and management of complications. Septic abortion, Criminal abortion, MTP Act Adoption laws.

NEW BORN

- 1. Care of newborn care of preterm, S.G.A.neonates, infants of diabetec mother
- 2. Asphyxia & Neonatal resuscitation (Respiratory distress syndrome and Meconium aspiration syndrome)
- 3. Neonatal sepsis prevention, Early detection & management.
- 4. Neonatal hyperbilirubinemia, investigation and management.
- 5. Birth trauma prevention, early detection & management.
- 6. Detection of congenital malformations in new born and make timely referrals for surgical corrections.
- 7. Management of the common problems in neonatal period.

GYNAECOLOGY :

Basic sciences

Development of genital tract and associated malformations. Basics of breast diseases related to ob/gy Applied anatomy of female genital tract, abdominal wall and urinary tract.

- Physiology of menstruation and ovulation Physiology of spermatogenesis Endocrinology - hypothalamus pituitary, thyroid and adrenal glands Neurotransmitters Common menstrual disorders and their management
- 2. Diagnosis and surgical management of clinical conditions related to congenital malformations of genital tract. Reconstructive surgery in gynaecology
- 3. Chromosomal abnormalities and intersex. Ambiguous sex at birth

- Reproductive Endocrinology : Evaluation of primary and secondary amenorrhoea, management of hyperprolactinemia, Hirsutism, chronic anovulation and PCOD,. Thyroid dysfunction.
- 5. Endometriosis and adenomyosis medical and surgical management.
- Infertility evaluation and management. Use of ovulation induction methods and Tubal microsurgery, Assisted reproduction techniques , management of immunological factors in infertility. Adoption law, medico-legal and ethical issues.
- 7. Reproductive Tract Infections, Sexually Transmitted Infections, HIV/AIDS : Prevention, Diagnosis and management.Genital Tuberculosis.
- Screening for genital malignancies cytology, colposcopy and biochemistry. Management of premalignant lesions
- 9. Benign and malignant tumors of genital tract Early diagnosis and management.
- 10. Principles and practice of oncology in gynaecology chemotherapy, radiotherapy, palliative treatment.
- 11. Supports of pelvic organs , genital prolapse, surgical management of genital prolapse.
- 12. Common urological problems in gynaecology SUI, voiding difficulties, VVF, urodynamics, surgical repair of genital fistulae, ureteric and bladder injuries.
- 13. Management of menopouse, prevention of complications, HRT, cancer screening genital, breast.
- 14. Recent advances.
- 15. Newer diagnostic aids USG, interventional sonography, other imaging techniques, endoscopy. 16. Hysteroscopy, laporoscopy - diagnostic, simple surgical procedures, including laparoscopic tubal occlusion, endometrial ablative techniques, colposcopy.
- 16. Medicolegal aspects, ethics, communications and counselling.(SEXUAL / ASSAULTS)
- 17. Operative gynaecology Selection of case, technique and management of complications of minor and major gynaecology procedures.
 - Abdominal and vaginal hysterectomy
 - Surgical procedures for genital prolapse
 - Surgical management of benign and malignant genital neoplasms.

- Repair of genital fistulae, SUI
- > Operative endoscopy Laparosocpic, Hysteroscopic
- 18. Recent advances in gynaecology diagnostic and therapeutic
- 19. Special groups Pediatric and adolescent gynaecology, geriatric gynaecology
- 20. Evidence based management

FAMILY PLANNING:

- 1. Demography and population Dynamics.
- 2. Contraception Temporary methods. Permanent methods
- 3. (vasectomy and female sterilization) Legal issues.
- MTP Act and procedures of MTP in first & second trimester.(Recent Amendments, Legal/ethical issues)
- 5. Emergency contraception.
- 6. Recent advances, New development, Future research work in contraceptive technology.

Recent Advances in Obst. & Gyn.

- 1. To teach how to access Cochrane library.
- 2. To teach how to go for reference from the library.

M.S. - OBSTETRICS & GYNAECOLOGY

EXAMINATION

UNIVERSITY EXAMINATIONS

After successful completion 3 Years' of residency

Theory Examination: Each paper 100 marks – 3 hrs duration

	Sections with marks		
	Basic sciences in Obstetrics and gynaecology including the		
Daparl	diseases of newborn.		
Paper I	4 questions 25 marks each		
	Total = 100 marks		
	Clinical Obstetrics including new born.		
Paper II	4 questions 25 marks each		
	Total = 100 marks		
	Clinical Gynaecology		
Paper III	4 questions 25 marks each		
	Total = 100 marks		
	Recent advances in Ob/Gy		
Paper IV	5 Questions of 25 marks each, out of which		
	4 questions have to be attempted		
	Total = 100 marks		
	TOTAL THEORY = 400		

Minimum passing marks in each head 40% and aggregate: 50% in all papers

Practical Examination:

Sr. No.	Description	Marks
1	2 Obstetric cases	50 each = 100
2	2 Gynaec cases	50 each = 100
	Micro Teaching	50
3	Topic to be given a day prior to	
	exam by internal examiner	
4	05 Cases Ward Round	25
Viva	Viva Obstetrics	50
	Viva Gynaec	50
	Dissertation Discussion	25
	TOTAL PRACTICAL	400

Minimum passing marks: 50% separate in clinicals and viva
